

**Angel Flight Central provides FREE flights for people in need.**

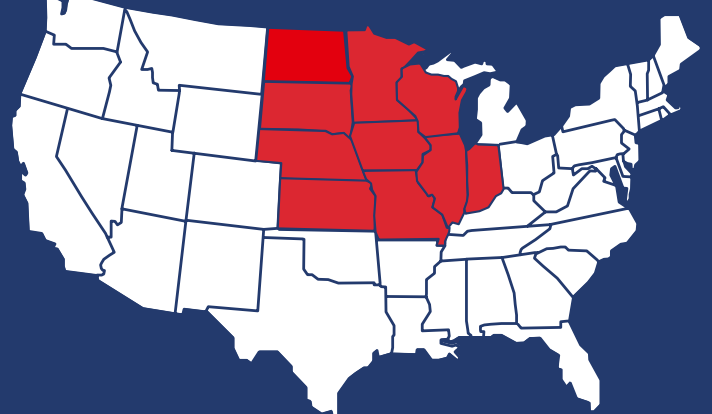

We currently operate two programs: **general aviation** and **commercial travel**.

In our general aviation program, patients and one companion (two if a minor) originating in our 10 state Midwest region (see map below) may request a flight under 900 nautical miles. Passengers need to be able to tolerate boarding and riding in a small aircraft. These flights are flown by our very generous and qualified volunteer pilots with their own time and aircraft.

In our commercial travel program, a grant through Southwest allows us to assist one medical traveler and one companion (two if a minor) from anywhere in the United States (where Southwest flies) with a commercial Southwest flight that is over 900 nautical miles.

In both instances, we reach out directly to a passenger's medical professional to obtain a release to fly in a general aviation or commercial aircraft. We are not an emergency service and need 7 - 10 business days to properly arrange a flight.

**Scan to complete flight request:**

Outside of this region, please reach out so we can refer you to additional resources in your area.

Visit **ANGELFLIGHTCENTRAL.ORG** to review the list of qualifications and to complete an official flight request.

Call us at **866-569-9464** for more info and any questions you may have.
